SUMMARY

Full-stack engineer with experience developing and operating production SaaS systems in international environments. Currently responsible for production deployment, system reliability, and application support across multiple services running on AWS. Experienced in debugging complex production issues across frontend, backend, and database layers. Strong background in React / Next.js frontend development and reusable component design, including multiple open-source React NPM packages with Storybook documentation. Combines product development experience with DevOps and operational knowledge to deliver stable, scalable web applications.

SKILLS

Languages: JavaScript (TypeScript), PHP, SQL, HTML, CSS

Frontend: React, Next.js, Vue, Nuxt, Redux Toolkit, Tailwind CSS, Storybook, Framer Motion

Backend: Laravel, Node.js, Express, FuelPHP, REST APIs, GraphQL

Databases: MySQL, PostgreSQL, Firebase, SQLite/Turso

Cloud & Infrastructure: AWS (EC2, ECS, RDS, CloudWatch, CodePipeline), Docker, CI/CD

Tools: Git, Cypress, Jest, Figma, Metabase

Other: Performance optimization, monitoring, incident response, database query optimization

EXPERIENCE

Software Engineer (DevOps / Platform) *January 2025 - Present*
Bizmates Inc., Tokyo, Japan

Responsible for production deployment, infrastructure operations, and application support for a multilingual SaaS platform.

- Coordinated and executed hundreds of production releases across multiple repositories using AWS CodePipeline and CI/CD workflows while ensuring service stability and safe rollback procedures
- Monitor and maintain AWS infrastructure including EC2, ECS, RDS to ensure service stability
- Investigate and resolve production incidents through log analysis, SQL debugging, and backend code fixes across Laravel, FuelPHP, Vue, and Nuxt applications
- Resolved long-standing system issues including database inconsistencies and race conditions affecting user accounts
- Implemented database constraints and validation logic to prevent duplicate records and improve data integrity
- Designed and implemented internal automation tools and admin features to reduce manual operational tasks across departments
- Optimized database queries and backend logic, improving performance of internal admin systems
- Contribute to modernization initiatives including framework upgrades and service separation from legacy systems

- Conduct code and SQL query reviews, mentor engineers, and coordinate deployments across teams in Japan, the Philippines, and Vietnam
- Collaborate with marketing, sales, and customer support teams to investigate system behavior and implement operational or feature-related system changes

Full Stack Engineer (Freelance) *September 2010 – December 2024*

Self-Employed

Worked as an independent engineer developing web applications, frontend component systems, and custom e-commerce solutions.

Frontend Development

- Built frontend applications using React, Next.js, TypeScript, Redux Toolkit, and Tailwind CSS
- Developed reusable component systems with Storybook documentation
- Implemented end-to-end testing using Cypress

Full Stack Development

- Developed web applications using PHP, MySQL, and Node.js
- Implemented backend APIs and business logic supporting frontend systems
- Built and customized Next.js e-commerce frontends integrated with Shopify

Open Source Development

- Designed and published multiple React UI component libraries on NPM
- Built interactive documentation and demos using Storybook
- Wrote technical articles explaining architecture and implementation decisions

OPEN SOURCE PROJECTS

All projects include interactive demos, Storybook documentation, and are published on NPM.

- **react-next-tilt**: High-performance 3D tilt animation component for React with extensive customization options.
- **react-flip-tilt**: Animation component built on top of the tilt engine with flip and parallax effects.
- **react-next-parallax**: Lightweight parallax animation component for React applications.

EDUCATION

Bachelor of Computer Engineering *Graduated Sep 2010 – Ferdowsi University, Mashhad, Iran*

CERTIFICATIONS

- JLPT (Japanese Language Proficiency Test) N2 (CEFR B2) – 2025
- TOEIC Listening & Reading Test 940/990 – 2026
