SUMMARY

DevOps Engineer with a background in frontend and full-stack development, experienced in supporting production systems and ensuring stable application operations. Skilled in release management, incident response, and system improvement across multi-service environments. Known for a careful, reliable approach to operations, strong collaboration with cross-functional teams, and the ability to bridge development and operations effectively.

EXPERIENCE

DevOps Engineer *January 2025 – Present*
Bizmates Inc., Tokyo, Japan

- Managed production deployments and system stability across multiple services.
- Operated CI/CD pipelines, supported safe releases, and handled rollback and recovery.
- Monitored cloud systems, investigated incidents, and performed root cause analysis.
- Reviewed changes to minimize risk and ensure service reliability.
- Supported and improved existing and legacy systems in collaboration with stakeholders.

Full Stack Engineer *September 2010 – December 2024*
Self-employed

- Worked on frontend-focused and full-stack web applications across multiple projects.
- Built responsive user interfaces, reusable components, and modernized legacy web systems.
- Contributed to full-stack implementations including server-side logic and database handling.
- Developed e-commerce and mobile applications and supported JavaScript-based ecosystems.
- Earlier experience includes contributing to indie and open-source game development projects.

EDUCATION

Bachelor of Computer Engineering *Graduated Sep 2010*
Ferdowsi University, Mashhad, Iran

CERTIFICATIONS

- Tsukuba Test – Battery of Japanese (TTBJ), 2024
- IKM JavaScript Assessment, 2024
